
Public Health **Post**

Media Kit 2019-2020

*Public Health Post (PHP) informs and
inflects the broader conversation on health.*

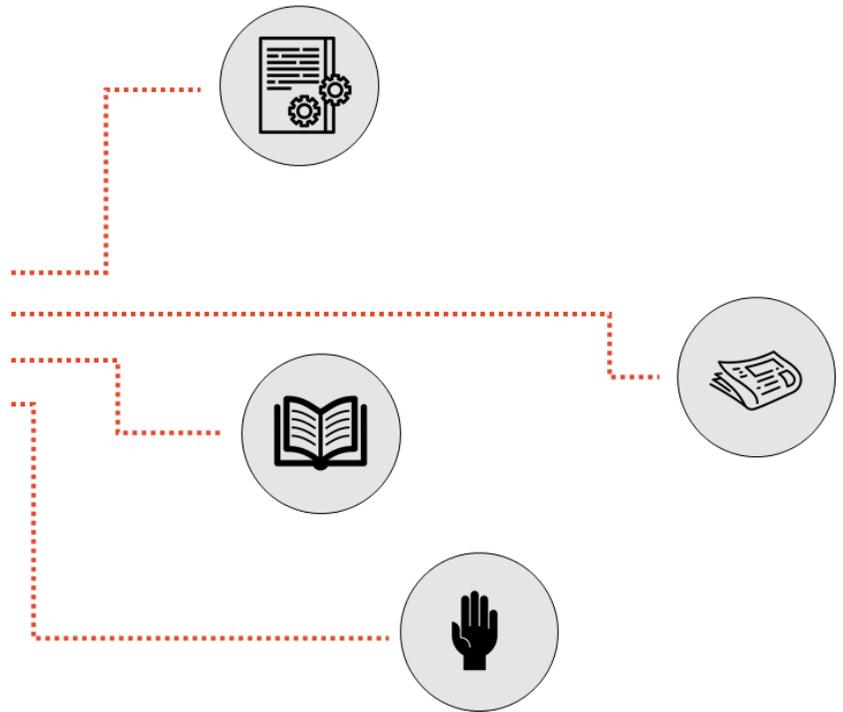

PHP

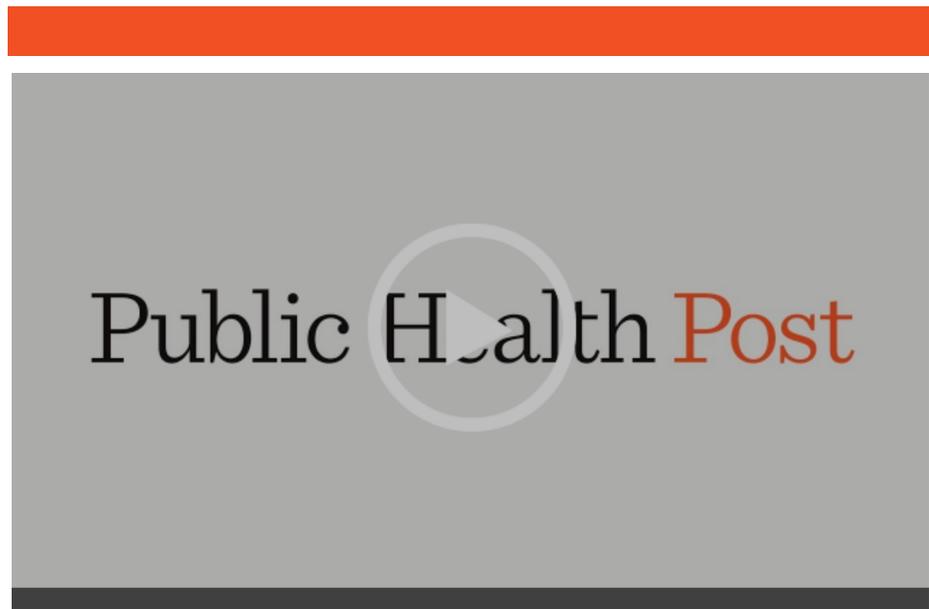

Public Health **Post**

Every day we feature new articles about the state of the health of the population.

Our editors, working with graduate student Public Health Post Fellows, present health statistics, traditional journalism, research summaries, interviews with important health thinkers, and easy-to-understand data graphics to **start new conversations about health.**

We invite policymakers, journalists, academics, and practitioners to share their work in ways that can influence health on a local, national, and global scale.

**WE JOIN AND DRIVE
THE NATIONAL
DIALOGUE ON
PUBLIC HEALTH.**

PHP's website and social media outlets highlight important research and perspectives. We strive to bring the public health topics of the moment to the public in an easy-to-understand interface with no jargon or hype.

Too Stressed for Academic Success

By Douglas Hoston | Richard Lamb
July 10, 2019

For historically underrepresented students, persistence and grit is seen as important for success. It also plays into the development of chronic stress.

@PubHealthPost

DO YOU HAVE A VIEW ON A PUBLIC HEALTH TOPIC OF THE MOMENT THAT NEEDS AIRING?

.....
@PubHealthPost

Many universities now consider general media impact of research findings as part of the promotion process and PHP brings your material to a new world of readers.

.....
@PublicHealthPost

Once your article is scheduled for publication, we will ask you for Twitter handles and hashtags we can include in social media posts to push your article out to a broad audience. We will also ask you to retweet and share with your networks.

RESEARCH
Design Thinking for Public Health
By Tara Murphy
August 24, 2018

Five Borough Farm Project, an initiative launched in 2009, brought urban farmers, designers, and policy makers together, using design thinking to expand urban agriculture in New York City.
